## EDUCATION

---

<b>Ph.D. Medical Physics, University of Chicago</b>   <i>Chicago, IL</i>	2021 – present
<ul style="list-style-type: none"><li>• Thesis: “Spectral x-ray imaging and quantitative phase retrieval”</li><li>• Advisor: Patrick La Rivière, Ph.D.</li></ul>	
<b>B.S. Physics &amp; B.A. Political Science, Duke University</b>   <i>Durham, NC</i>	2016 – 2020
<ul style="list-style-type: none"><li>• Honors: Angier B. Duke Memorial Scholar, Cum Laude</li></ul>	
<b>Hillsborough High School</b>   <i>Tampa, FL</i>	2012 – 2016
<ul style="list-style-type: none"><li>• International Baccalaureate Program, top exam score in graduating class</li></ul>	

## AWARDS & HONORS

---

<b>Graduate Research Fellowship</b>   <i>National Science Foundation</i>	2023 – 2026
<b>\$900 Students &amp; Trainees Partial Scholarship</b>   <i>Virtual Imaging Trials in Medicine Conference</i>	2024
<b>\$750 Student Travel Award</b>   <i>SPIE Medical Imaging Conference</i>	2024
<b>Carl J. Vyborny Award, Best Journal Club Talk</b>   <i>Grad. Program in Medical Physics, University of Chicago</i>	2024
<b>2<sup>nd</sup> place, Young Investigator Symposium</b>   <i>American Assoc. of Physicists in Medicine, Midwest Chapter</i>	2023
<b>\$2,000 Small Grant</b>   <i>Office of Diversity &amp; Inclusion, Biological Sciences Division, University of Chicago</i>	2023
<b>5<sup>th</sup> place, Truth-Based CT Reconstruction Challenge</b>   <i>American Assoc. of Physicists in Medicine</i>	2022
<b>\$3,500 Summer Research Fellowship</b>   <i>Physics Department, Duke University</i>	2020
<b>Runner-Up Poster, Bass Connections Showcase</b>   <i>Interdisciplinary Studies, Duke University</i>	2020
<b>Angier B. Duke Memorial Scholarship</b>   <i>Duke University</i>	2016 – 2020
<b>Lord Rothermere Fellowship</b>   <i>Oxford University</i>	2017

## RESEARCH EXPERIENCE

---

<b>Ph.D. Candidate</b>   <i>Graduate Program in Medical Physics, University of Chicago</i>	2021 – present
<ul style="list-style-type: none"><li>• Advised by: Patrick La Rivière, Ph.D.</li><li>• Modeling spectral or multi-energy propagation-based <a href="#">phase-contrast</a> x-ray imaging techniques to develop a quantitative solution to the phase retrieval problem.</li><li>• Quantified achievable image quality with “MV-kV” dual-energy CT using <a href="#">estimation theory</a> in the context of basis material decomposition and <a href="#">simulation</a> techniques.</li><li>• Implemented <a href="#">multi-material decomposition</a> for dual-energy CT with cardiac imaging applications.</li><li>• Simulated <a href="#">CT</a> acquisitions with energy-integrating and photon-counting detectors for comparison.</li><li>• Mentored summer student on project assessing dual-energy CT detectors for radiotherapy.</li></ul>	
<b>Research Technician II</b>   <i>Ravin Advanced Imaging Labs, Duke University</i>	2020 – 2021
<ul style="list-style-type: none"><li>• Advised by: Ehsan Samei, Ph.D. &amp; Ehsan Abadi, Ph.D.</li><li>• Helped develop realistic CT simulator (DukeSim), implementing features including beam hardening correction, tube current modulation, spherical detector geometry, photon counting noise model.</li><li>• Created DukeSim Python wrapper for rapid simulation studies.</li><li>• Developed and taught DukeSim trainings for other lab members.</li></ul>	

**“Saxophone Mouthpiece Design” Research Team** | *Interdisciplinary Studies, Duke University* 2019 – 2020

- Advised by: Joshua Socolar, Ph.D. & Matthew Busch
- Created 3D archive of vintage sax mouthpieces using micro-CT scans.
- Extracted audio metrics from Fourier spectra of recordings with original vintage mouthpieces and 3D-printed copies.
- Analyzed micro-CT measurements in relation to extracted audio metrics in Python.

**Undergraduate Research Assistant** | *Physics Department, Duke University* 2019 – 2020

- Advised by: Christoph Schmidt, Ph.D.
- Assessed membrane response of *E. coli* under different osmotic conditions.
- Quantified elastic bending energy of bacterial membranes by writing image analysis scripts and running *Surface Evolver* simulations.

**Clinical Research Intern** | *Digestive Health Institute, Florida Hospital Tampa* 2015 – 2016

- Advised by: Alexander Rosemurgy, M.D. & Sharona Ross, M.D.
- Shadowed physicians in the clinic, on rounds, and in the operating room.
- Conducted rigorous statistical analysis and chart review of patients with esophageal disorders.
- Assessed post-op. satisfaction of achalasia patients with respect to age and other comorbidities.

## PUBLICATIONS

---

### Peer-reviewed manuscripts

1. Giavanna Jadick, Geneva Schlaflly, and Patrick J La Rivière. Dual-energy computed tomography imaging with megavoltage and kilovoltage x-ray spectra. *Journal of Medical Imaging*, 11(2):023501–023501, 2024
2. Ehsan Abadi, Giavanna Jadick, David A Lynch, W Paul Segars, and Ehsan Samei. Emphysema quantifications with CT scan: Assessing the effects of acquisition protocols and imaging parameters using virtual imaging trials. *Chest*, 163(5):1084–1100, 2023
3. Giavanna Jadick, Ehsan Abadi, Brian Harrawood, Shobhit Sharma, W Paul Segars, and Ehsan Samei. A scanner-specific framework for simulating CT images with tube current modulation. *Physics in Medicine & Biology*, 66(18):185010, 2021

## TEACHING EXPERIENCE

<b>qBio Bootcamp Teaching Assistant</b>   <i>Biological Sciences Division, University of Chicago</i>	2023
<ul style="list-style-type: none"> <li>TA for the Quantitative Biology “qBio” bootcamp to teach coding principles to incoming biological sciences Ph.D. students using R.</li> <li>Head TA for the image analysis workshop with Jasmine Nirody, Ph.D.</li> </ul>	
<b>“Introduction to Coding in Science” Instructor</b>   <i>Chicago EYES on Cancer, University of Chicago</i>	2023
<ul style="list-style-type: none"> <li>Designed a <a href="#">four-part coding bootcamp</a> for high school and undergraduate summer research students to teach fundamentals of coding.</li> <li>Taught basic principles (syntax, logic gates, etc.) and applications in data analysis and imaging.</li> </ul>	
<b>Medical Physics Teaching Assistant</b>   <i>Graduate Program in Medical Physics, University of Chicago</i>	2022 – 2023
<ul style="list-style-type: none"> <li>Graduate TA for “Mathematics for Medical Physics” (Autumn 2022) and “Physics of Medical Imaging 1” (Winter 2023).</li> <li>Led discussion sessions with short lectures, group problem solving, and <a href="#">interactive Jupyter Notebooks</a> to demonstrate concepts such as the 2D Fourier Transform and Radon Transform.</li> <li>Graded and provided detailed feedback on homework assignments, lab reports, and final exams.</li> </ul>	
<b>Physics Teaching Assistant</b>   <i>Department of Physics, Duke University</i>	2017 – 2020
<ul style="list-style-type: none"> <li>Independently led labs and helped grading for introductory mechanics and E&amp;M courses.</li> <li>Assisted in rapid transition of E&amp;M labs to a virtual format for summer 2020.</li> </ul>	
<b>Physics Community Outreach Volunteer</b>   <i>Physics Department, Duke University</i>	2017 – 2020
<ul style="list-style-type: none"> <li>Performed basic physics demonstrations for gradeschool students at science fairs and field trips.</li> </ul>	
<b>House Course Student Instructor</b>   <i>Trinity College of Arts &amp; Sciences, Duke University</i>	2019 – 2020
<ul style="list-style-type: none"> <li>Designed and taught two undergraduate courses after competitive proposal process.</li> <li>“Physics for Everyone” on equity in STEM and best learning techniques.</li> <li>“Physics in Cinema” exploring laws of physics through movie analysis.</li> </ul>	
<b>Math Teaching Assistant</b>   <i>Department of Mathematics, Duke University</i>	2020
<ul style="list-style-type: none"> <li>Assisted students in the introductory calculus help room.</li> </ul>	
<b>Computer Science Teaching Assistant</b>   <i>Department of Computer Science, Duke University</i>	2017
<ul style="list-style-type: none"> <li>Co-led weekly labs and graded exams for introductory computer science.</li> </ul>	

## LEADERSHIP EXPERIENCE

---

- Director of Outreach** | *Diversity & Outreach Committee, Medical Physics, University of Chicago* 2022 – present
- Led the medical physics graduate program's involvement in annual on-campus science fairs.
  - Secured grant funding to design and build new CT, MRI, and radiation therapy demos.
  - Organized students and faculty in drafting the program's 2022 Diversity Statement.
  - Worked with Chicago Public Schools and UChicago Comprehensive Cancer Center to host professional learning days for physics teachers with research talks, outreach demos, and lab tours.
  - Worked with UChicago Comprehensive Cancer Care Center to purchase a portable ultrasound for off-campus outreach presentations.
  - Organized and delivered presentations at Lindblom Math & Science Academy and Tilden High.
- President** | *Graduate Program in Medical Physics, University of Chicago* 2022 – 2023
- Elected to serve as the primary liaison between medical physics students and faculty.
  - Joined faculty meetings and organized regular meetings with the program director and students.
  - Facilitated student initiatives: bi-weekly journal club, peer-mentor program, and office lunches.
  - Led planning and coordination of the bi-annual retreat.
- President** | *Society of Physics Students, Duke University* 2018 – 2020
- Reestablished the chapter, directed executive meetings, authored constitution and by-laws, secured funding, and designed website.
  - Launched several projects including crash courses in Mathematica and MATLAB, career advising sessions, and community outreach.
  - Won multiple National SPS awards (2019 Distinguished Chapter, 2020 Outstanding Chapter).

## OTHER EXPERIENCE

---

- Peer reviewer** | *Journal of Medical Imaging* 2023 – present
- American Institute of Physics Mather Public Policy Intern** | *U.S. House of Representatives* 2019
- Rotated through subcommittees in the House Committee on Science, Space & Technology.
  - Researched upcoming hearing topics (deep sea exploration, renewable energy, artificial intelligence, etc.) and prepared briefs for members of Congress.
  - Met with invited scientists, discussed their work, and observed their remarks in hearings.
  - Collected demographic data of Capitol Hill briefings and analyzed results using text and regression analyses in Python, presented at the Society of Physics Students internship closing symposium.
- Climate Policy Intern** | *Niskanen Center, Washington, DC* 2018
- Assessed and presented the merits of competing climate modeling techniques with thorough literature review.
  - Designed interactive Bayesian belief networks in Python as tools for politicians to better understand climate science.

## PROFESSIONAL AFFILIATIONS

---

- SPIE** | *Student Member* 2021 – present
- AAPM** | *Student Member* 2021 – present
- Pi Sigma Alpha, Political Science Honor Society** | *Member* 2020 – present
- Sigma Pi Sigma, Physics Honor Society** | *Member* 2019 – present

## SKILLS

---

- Computational:** Bash, C/C++, CUDA, ImageJ, Git, L<sup>A</sup>T<sub>E</sub>X, Linux/Unix, Python, MATLAB, Mathematica, R
- Libraries:** CuPy, pandas, numba, NumPy, Matplotlib, PyCuda, SciPy
- Experimental:** CT, microscopy (DIC, confocal, AFM), micro-CT, electronics, misc. wet lab
- Interests:** Jazz saxophone, flamenco guitar, Spanish and Italian language, geography, political philosophy
